

# Measure Ground Control

## World-Class Drone Software Powered by Pix4D

Measure Ground Control™ (MGC) is an end-to-end solution that lets you manage your drone operations and easily create quality data products using industry-leading tools like Pix4D.

**Mobile Flight Application** – Fly and capture data with a user-friendly mobile app built for commercial use, then automatically upload your flight logs and screen shots for seamless activity tracking.

**Mapping & Data Analysis** – Produce high-quality data products with an easy-to-use web portal and integrated, industry-leading data tools such as Pix4D.

**Drone Program Management** – Streamline your operations with comprehensive mission planning, easy management of users and equipment, and robust reporting of program activity.

**Enterprise Solutions** – Get a solution customized to your business needs with advanced inspection tools, system integrations, and priority customer support.

### Available Subscriptions

#### PRO

\$69/mo paid annually or \$99 monthly

Perfect for individual pilots who want a simple solution for collecting data and creating maps, our Pro plan includes 2000 processed images per month and online customer support.

#### TEAMS

\$199/user/mo annually or \$299/user monthly

Teams enables small and medium businesses to efficiently manage their team, equipment, and data. Includes processing of 6000 images per user, per month and online customer support.

#### ENTERPRISE

Custom pricing

Enterprise adds features, integrations, and support that big businesses need to make their drone program a success. Includes a tailored data allocation, custom system setup, and priority customer support via phone and email.

• Included   ◦ Available

	Pro (1 user)	Teams (2+ users)	Enterprise (25+ users)
<b>Flight Control &amp; Data Collection.</b> <i>Fly safely and collect quality data with a user-friendly app, airspace tools, and autonomous flight paths.</i>			
<b>Mobile App.</b> Fly and capture data with a user-friendly mobile app built for commercial use. Available for iOS, Android, and Crystal Sky. Connects to DJI drones.	•	•	•
<b>Airspace Tools.</b> Check weather and airspace, request LAANC authorization, retrieve and apply DJI Geo-Unlock.	•	•	•
<b>Autonomous Flight.</b> Setup automated grid flight paths or use advanced waypoint tools.	•	•	•
<b>Advanced Planning Options.</b> Upload a KML file or import your existing map tile layers.	•	•	•
<b>Active Track Modes.</b> Use active track modes including spotlight, POI, trace, orbit, and profile.	•	•	•
<b>Flight Checklists.</b> Help ensure safe operations with pre-flight checklists.	•	•	•
<b>Live Streaming.</b> Stream live to any RTMP service.	•	•	•
<b>Automatic Uploads.</b> Automatically upload detailed flight logs and mission screen captures.	•	•	•
<b>DroneInsurance.com.</b> Access on-demand flight coverage, 24/7 ground coverage and physical damage protection for drones, sensors, and ground equipment.*	•	•	•
<b>Intelligent Inspection Modes.</b> Collect data for inspections of structures such as wind turbines or utility poles.			◦
<b>Data Processing and Analysis.</b> <i>Produce high quality data products with an easy-to-use web portal and industry-leading data tools such as Pix4D.</i>			
<b>Data Storage.</b> Upload and store high resolution image files for each mission.	•	•	◦
<b>Mapping.</b> Process images into high-resolution orthomosaics, digital surface models, and contour maps with the industry leader in photogrammetry, Pix4D.	2000 images/mo	6000 images/mo	Custom
<b>RTK Processing.</b> Increase image processing accuracy with RTK drone data.	•	•	◦
<b>Map Viewer.</b> View your orthos and other 2D data files on an interactive, account-wide map.	•	•	◦
<b>Measurements and Overlays.</b> Measure linear distance and area or add a 2D image layer to your map.	•	•	◦
<b>Exportable Files.</b> Export 2D and 3D data products (ortho, DSM, contour map) as GeoTIFF or GeoJSON files.	•	•	◦
<b>Inspection Viewer.</b> Sort and upload your asset inspection images to an interactive map powered by Scopito.			◦
<b>Inspection Annotation.</b> Zoom-in, classify defects, add comments, and sort inspection data.			◦
<b>Downloadable Inspection Reports.</b> Create and download a PDF report customized to show the inspection results important to your business.			◦
<b>Program Management and Integrations.</b> <i>Plan missions, track program activity, and easily manage your operations.</i>			
<b>Scheduling.</b> Schedule missions, assign resources, and manage your program calendar.	•	•	•
<b>Centralized Mission Management.</b> Access everything about your mission - logs, pilots, aircraft, flight plans, files, and data products - all in one place.	•	•	•
<b>Web-based Flight Planning.</b> Check airspace and build grid flight paths to push to the integrated flight app.	•	•	•
<b>Automatic Flight Log Uploads.</b> View automatically uploaded flight logs, including detailed parameters, flight playback, and screen captures.	•	•	•
<b>DJI Log Sync.</b> Input your DJI user ID to easily import flight logs from DJI Go or DJI Pilot.	•	•	•
<b>Manual Flight Logging.</b> Log flights from non-DJI aircraft using auto-fill forms.	•	•	•
<b>Activity Audits and Alerts.</b> Check automatically flagged incidents for activity outside of safety best practices.	•	•	•
<b>Program Reporting.</b> Track your program metrics on dashboards and exportable reports.	•	•	•
<b>Equipment Management.</b> Create equipment kits, make annotations, and automatically track usage.	•	•	•
<b>User Profiles and Permissions.</b> Add users, setup user profiles, and limit access with pre-defined roles.		•	•
<b>Image Allocation Sharing.</b> Combine the monthly image processing allocation from all your users into a single, shared account so you can optimize your team's usage.		•	•
<b>Single Sign On.</b> Enable users to access multiple company applications or resources with one login.			◦
<b>Premium Integrations.</b> Integrate drone operations and data into Enterprise Asset Management systems.			◦
<b>Geospatial API Access.</b> Build custom apps and integrations for your organization to connect with MGC.			◦
